

MODEL US1000HLB BATTERY-POWERED LOADING TABLE

U.S. Cremation Equipment's Model US1000HLB Battery-Powered Loading Table enables an operator to easily transfer caskets or containers from and to vehicles, mortuary refrigeration units or storage areas. The double scissor type table allows for quick and easy insertion of caskets or containers into a cremation chamber. Virtually maintenance free and requiring minimum space, this rugged unit will provide years of trouble free operation.
